

QbD CONSULTING TO USE PROCEDURECAPTURE TO SATISFY VALIDATION REQUIREMENTS FOR THEIR PHARMA AND LIFE SCIENCES CUSTOMERS.

Belgium, Europe – November, 2013

QbD Consulting to Use ProcedureCapture To Satisfy Validation Requirements for Their Pharma and Life Sciences Customers.

QbD is firmly established as a consultancy agency in both Belgium and the Netherlands and has a broad customer base ranging from small companies to large enterprises.

Today's life sciences companies are faced with a myriad of regulations driving increasing reliance on advanced enterprise solutions to achieve sustained compliance and efficiency. In most cases, automated systems that drive mission-critical cGMP and manufacturing processes require software validation.

Validation ensures that systems perform according to their intended use and are in compliance with key regulatory requirements.

Belgium, Europe – May, 2013 - Raltus Software, the leading solution for improving quality and reducing testing costs, announced that QbD Consulting Group recently selected ProcedureCapture to help their life sciences companies to validate their Software procedures so that they comply with regulatory requirements.

ProcedureCapture is the only solution which generates conclusive and indisputable documented evidence and uses a single license for the whole lifecycle of :

- Requirements Management
- Risk Assessment
- Test Script Capture
- Review and Pre Approval of Scripts
- Paper and Paperless execution
- Manual or Automated testing with Electronic Signatures
- Trace Matrices and generation of documented evidence
- End user guides and training materials

Bart Van Acker, QbD's Managing Director commented "ProcedureCapture is the only tool we have found which is capable of both generating image populated compliant documentation and then if required use the same asset to paperlessly run and electronically sign the actual procedures to confirm that they works as expected."

"ProcedureCapture is the only tool we have found which is capable of both generating image populated compliant documentation and then if required use the same asset to paperlessly run and electronically sign the actual procedures to confirm that they works as expected."
